**Notice Period:** 1 Month

## PROFESSIONAL SUMMARY

Data Engineer at PwC with **2 years** of end-to-end delivery across **6 client engagements** spanning pharma, chemicals, consumer goods, energy, and insurance (Europe, Asia, US). Sole designer of a production-grade, config-driven Medallion Architecture ETL framework (Python/Databricks/SQL) - adopted by **4-5 teams**, validated on **20+ data objects with 100% accuracy**, infinitely scalable with zero code changes per new object. Holds **6 Microsoft Azure certifications** (DP-203, DP-600, AZ-204, AZ-500, DP-900, AZ-900). Familiar with orchestration (Airflow), streaming (Kafka), and containerization (Docker) to support scalable production pipelines. CS research background in AI and security.

## WORK EXPERIENCE

### Associate Data Engineer | PwC | Gurugram, India

September 2024 - Present

**AXA (Insurance) - Bronze-to-Silver ETL Platform - Python, Databricks, SQL**

- **Sole-designed a config-driven ETL framework** on Medallion Architecture - **processed 20+ data object types with 100% accuracy**, zero code changes per new object; **adopted by 4-5 teams**, cutting per-object onboarding from weeks to hours.
- **Implemented full SCD suite (Types 0/1/2/6)** with MD5 hash-based **Change Data Capture** and a structured **Data Quality Framework** (audit trails, anomaly tracking, per-run statistics) - eliminating manual QA effort across all 20+ objects.
- Built a flexible transformation engine with SHA-256 PII hashing, multi-source joins, regex cleansing, and 11-operator WHERE filtering - all config-driven via Excel, extending to **Delta Lake/Data Lakehouse** with data lineage and optimal partitioning.

**Multi-Client SAP Migration - Inpex (Japan), IVL Chemicals (Belgium & China), Spectrum Brands, Therapak - SAP BODS, S/4HANA, Python**

- **Inpex (Energy, Japan)**: Independently designed and delivered **15+ complex BODS ETL jobs** for RTR and Joint Venture objects on S/4HANA - authored transformation flows, data mappings, and quality validation end-to-end; zero defects post-delivery on all objects.
- **IVL Chemicals (Belgium & China)**: Delivered **10-15 RTR objects** across two cross-border subsidiary integrations — managed BODS transformations, data mappings, and quality validation for both European and Asian entities, ensuring seamless migration and **99.8% data integrity**.
- **Therapak (Pharma)**: Built Python automation as first PwC resource on a merger-driven SAP consolidation - **reduced migration time by 90%** (2 days to under 2 hours) with **99.8% data accuracy, saving 130+ manual hours per migration cycle**.
- **Spectrum Brands (Consumer Goods)**: Delivered **10-15 customer master objects** — full lifecycle ownership from object design to validated load across complex cross-border SAP migrations.

### Technology Consultant Intern | PwC | Gurugram, India

May 2023 - July 2023

- Built a GenAI proof-of-concept using Azure Cognitive Services to auto-summarise Business Requirement Documents, cutting manual review time; integrated a PowerApps front end secured with Azure Blob Storage (SAS tokens).

### Security Intern | SAP | Remote, India

August 2022 - September 2022

- Executed vulnerability assessments, password policy audits, and phishing simulations; findings contributed to hardening recommendations for enterprise authentication and incident response protocols.

## TECHNICAL SKILLS

**Data Engineering:** Python (pandas, PySpark), SQL, Apache Spark, Databricks, Delta Lake, Data Lakehouse, ETL/ELT design, Medallion Architecture, SCD 0/1/2/6, MD5 CDC, Data Quality Framework, Data Modeling

**Azure Cloud:** ADF, Databricks, Synapse Analytics, Event Hubs, Blob Storage, ADLS, Azure Cognitive Services

**SAP:** BODS, MDG, LTMC, S/4HANA - data migration, RTR, JV, customer master objects

**AI/ML:** Transformer models (fine-tuning), GenAI (Azure Cognitive Services), Python automation, Qiskit (Quantum Computing)

**Databases:** PostgreSQL, MySQL, SQL Server, Parquet

**Tools & Platforms:** Apache Airflow, Apache Kafka, Docker, Git, CI/CD (familiar)

## CERTIFICATIONS

- **Azure Developer Associate (AZ-204)** - Microsoft, February 2025
- **Azure Security Engineer Associate (AZ-500)** - Microsoft, February 2025
- **Fabric Analytics Engineer Associate (DP 600)** - Microsoft, November 2024
- **Azure Data Engineer Associate (DP-203)** - Microsoft, October 2024
- **Azure Fundamentals (AZ-900) -** Microsoft, October 2024

## ACADEMIC PROJECT

**De-AI: Human vs AI Code Classifier** October 2023 - April 2024

- Fine-tuned a custom transformer model achieving **80% classification accuracy** across BERT, GPT, Bard, and Gemini outputs; built custom data preprocessing pipelines (pandas, tokenization) to clean and prepare 50k+ code samples for model training.
- Open-sourced at - https://github.com/CapTaaha/De-AI

## EDUCATION

**B.Tech in Computer Science and Technology**November 2020 - November 2024
Indian Institute of Engineering Science and Technology (IIEST), Shibpur | CGPA: **8.77/10**
Thesis: De-AI - Fine-tuned transformer model for AI vs human code classification (80% accuracy)
**IELTS Academic: Band 8.0/9.0** (C2 Listening and Reading, C1 Speaking and Writing) | **Urdu/Hindi: Native**

## LEADERSHIP AND VOLUNTEERING

- **CodeIIEST Cybersecurity Chapter Lead**: Organized 10+ workshops and CTF events for **700+ participants** across institutions - drove technical security education at scale.
- **PwC CSR Group**: Mentored underprivileged students in digital literacy and inclusion.
